**13th Annual conference of the
Indian Heart Rhythm Society**

17th - 19th December, 2021 | Mumbai

**Pre - Conference Workshop
13th & 15th December, 2021 | Mumbai**

WELCOME MESSAGE

Dear Colleague,

As we tread through 2021, the COVID-19 pandemic seems refusing to relent; social distancing, lockdowns and vaccination strategies are providing the soothing balm. In 2020, unlike many other professional bodies, the Indian Heart Rhythm Society (IHRS) did not annul its conference, but conducted the VIRTUAL IHRS 2020 with stupendous scientific and organizational success. The on-line platform certainly has advantages: a larger spread of the scientific program, engagement of many more national and international faculty, extending the target audience beyond cardiac EPs & EP fellows - to cardiologists interested in Arrhythmia management, cardiology residents-in-training, physician-cardiologists & allied health professionals - from our country and offshore, greater fostering of ties with cardiology & heart rhythm societies around the globe and opportunities for a meaningful interaction with the industry. Having considered in-person and hybrid options during the rarefactions, eventually a **DIGITAL IHRS 2021:Your Touchpoint to Unlock EP** was conceived! The 13th Annual conference of the IHRS will be conducted **100% online between 17th –19th December, 2021.**

The Scientific committee led by IHRS President, Dr. Yash Lokhandwala has planned a **3 day, 3 theatre academic program**. In **Theatre 1** we discuss cutting-edge science with practicing senior cardiac arrhythmia & heart failure specialists, the **Theatre 2** provides “hands-on” training to the cardiac EP fellows and the **Theatre 3** would suit a wider audience - interventional cardiologists, physician-cardiologists, more than 1000 cardiology trainees from all over India & allied-health professionals (technicians & nurses). A large number of IHRS & invited international faculty would partake in this extravaganza spread over more than 45 sessions covering advances in EP & Ablation, CIEDs, Pediatric Arrhythmias, Electroanatomy & much more! Be there to listen to the present-day KOLs!

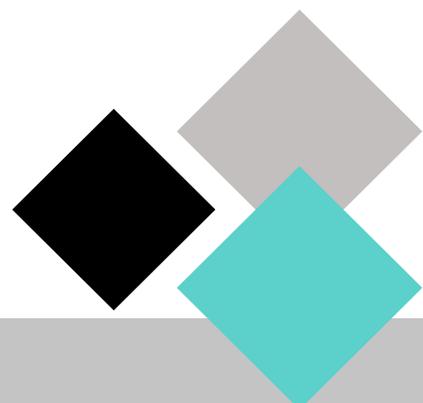

The Organizing committee under the stewardship of Professor Dr Prafulla Kerkar has taken the responsibility of delivering a successful DIGITAL IHRS 2021 through meticulous planning of all the logistics. Cardiac EPs from the city of Mumbai have left no stone unturned to make this wish come true! We will invite a BIG audience for this meeting, from India as well as abroad, and provide complimentary registrations. We want to read your thoughts in the chat box and hear you in the amply budgeted Q&A sessions. A practice-changing idea may sprout in any corner of India or may come from a distant continent. This is the open door philosophy of DIGITAL IHRS 2021:Your Touchpoint to Unlock EP!

Please mark your calendar, save your dates, reorganize your clinical work and be there -online for the DIGITAL IHRS 2021, this year's blockbuster of the Indian Heart Rhythm Society!

Warm regards,

Ashish Nabar
Organizing Secretary
